Appl No. 10/596,281 OK TO ENTER: /D,S,/

Amdt. Dated May 21, 2009

Reply to the Office action of January 21, 2009

Amendments to the Claims

Kindly cancel claim 5 and amend claim 1 as indicated in the listing below without prejudice to the subject matter involved. This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) An agrochemical composition comprising an agrochemical active ingredient which is paraquat or diquat or mixtures thereof and an amine adjuvant selected from triethylenediamine (TEDA) or a salt thereof and tetramethylethylenediamine (TMEDA) or a salt thereof, which amine adjuvant has no surfactant properties, and wherein the ratio by weight of the amine adjuvant to the agrochemical active ingredient is from 1:10 to 1:2.

2 – 3 (cancelled)

- 4. (Currently amended) The agrochemical composition of claim $\frac{3}{2}$ wherein the concentration of the paraquat or diquat or mixtures thereof is greater than 100 g/l.
- 5 7 (cancelled).
- 8. (Original) The agrochemical composition of claim 4 which further comprises from 10 to 400 grams per litre, of an electrolyte purgative.
- 9. (Original) The agrochemical composition of claim 8 wherein said electrolyte purgative is magnesium sulphate.
- 10. (Original) The agrochemical composition of claim 8 which further comprises an alginate which is a pH-triggered gelling agent such that a pH-triggered gel effect takes place at the acid pH of human gastric juice.
- 11. (Original) The agrochemical composition of claim 9 which comprises from 10 to 100 grams per litre of magnesium sulphate as an electrolyte purgative.
- 12. (Original) The agrochemical composition of claim 1 which further comprises a second adjuvant.

13. (Original) The agrochemical composition of claim 12 wherein said second adjuvant is a

surfactant.

14. (Original) The agrochemical composition of claim 13 wherein said surfactant is selected from

the group consisting of alkyl polyglycosides, betaines, alkylethoxy phosphates and salts thereof,

alcohol ether carboxylic acids and salts thereof, alcohol ether sulphates and salts thereof.

15. (Original) The agrochemical composition of claim 12 wherein said second adjuvant is present at

a lower concentration that said amine adjuvant.

16. (Currently amended) The agrochemical composition of claim 15 wherein said second adjuvant

is selected from the group consisting of alcohol ethoxylates, amine ethoxylates, amine oxides and

cationics such as quaternary ammonium salts.

17. (Original) The agrochemical composition of claim 16 wherein the ratio by weight of the amine

adjuvant to the second adjuvant ranges from about 50:1 to 1:50.

18. (Original) The agrochemical composition of claim 17 wherein the ratio by weight of the amine

adjuvant to the second adjuvant ranges from about 10:1 to 1:10.

19. (Original) The agrochemical composition of claim 16 wherein the ratio by weight of the amine

adjuvant to the second adjuvant ranges from about 1:1 down to 1:25.

20. (Original) The agrochemical composition of claim 19 wherein the ratio by weight of the amine

adjuvant to the second adjuvant ranges from about 1:4 to 1:15.

21. (Original) The agrochemical composition of claim 12 wherein the ratio by weight of the amine

adjuvant and the second adjuvant to the agrochemical active ingredient is preferably from about

1:10 to 10:1.

Appl No. 10/596,281 Amdt. Dated May 21, 2009

Reply to the Office action of January 21, 2009

22. (Original) The agrochemical composition of claim 21 wherein the ratio by weight of the amine adjuvant and the second adjuvant to the agrochemical active ingredient is preferably from about 1:5 to 10:1.
